

To Power Cost Equalization (PCE) Participating Utilities & Communities;

As some of you may be aware, the Alaska Energy Authority (AEA) recently had personnel transitions within its PCE team. During this period, a backlog of unprocessed Utility Monthly Reports (UMRs) came to light. The PCE team at AEA has been working diligently in the past weeks to address this, and I am pleased to report that AEA has no UMRs currently in process that are over 30 days from submission.

AEA's PCE team is committed to improving responsiveness to the PCE community. To that end, efforts are currently focused on timely community facility evaluations and production of the annual PCE Statistical Report.

If you have any unresolved issues or unprocessed community facility determination requests, please notify AEA's PCE team, to ensure these are not inadvertently overlooked during this transition. Contact information is provided below. In your correspondence, please let us know the nature of your outstanding issue, and we will work with you to get it resolved as soon as possible. Thank you for your patience in this matter as we continue to provide the support you need to maximize your PCE benefits.

Sincerely,

Tim Sandstrom
